(NO ENCLOSURE THIS COPY) 7 December 1953

MEMORANDUM FOR: Director of Central Intelligence

**SUBJECT: Briefing Note on the Proposed
Resistance Intelligence Committee**

REFERENCE: IAC-D-75/2 (attached)

1. Representatives of all IAC agencies except FBI and AEC have concurred in this paper. The latter were either not sufficiently involved or were not able to attend the meetings, but I doubt they will have objections.

2. I have explained informally to Mr. Kuhrtz of the FBI that the agencies pointed out in their discussion the importance of the contribution which the FBI might make from its resources on this problem and that it would be useful in the IAC discussion if the FBI representative could indicate what help from them would be possible.

3. A coordinated, but disagreed, paper has gone forward to the DD/I and the DCI on the question of the location of the responsibility within the Agency for our contribution to this joint effort. For this reason I cannot state at this time where this responsibility will reside. However, there is no disagreement that CIA should provide the leadership.

4. Recommendations: That you and the IAC approve the recommendations of the paper and that you request the agencies to submit the names of their representatives on the new committee to the Secretary of the IAC.

FBI review
completed.

**Assistant Director
Intelligence Coordination**
